

# Are You Getting Enough Benefits from Your Copper Source?

## Choose Emerald-C

Old Bridge Chemical's Emerald-C is specially manufactured for the feed industry. The manufacturing process for Emerald-C was specifically designed to obtain copper carbonate that has better bioavailability than other inorganic forms of copper including other copper carbonates. This increased bioavailability has been shown in many recent studies\*.

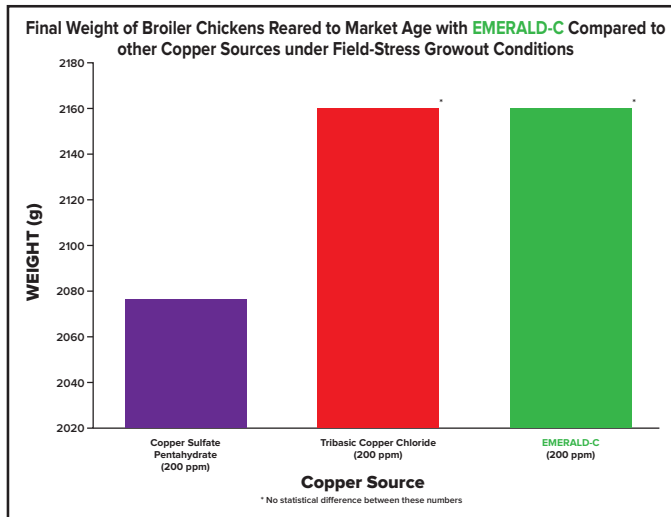

### Emerald-C delivers First-Class benefits:

- Contains 56% copper compared to 25.2% in copper sulfate
- Non-reactive with other nutrients in the premix
- As a bound copper, copper becomes active in the digestive system, where it counts!
- Easy to handle and blend
- Contains NO sulfates or chlorides
- OMRI certified for use in organic animal feed.

Ask for Old Bridge Chemical's Emerald-C by name!
